

Dante Domain Manager

is more security, organization, scalability, and control for Dante networks

Dante Domain Manager™

DANTE DOMAINS **Divide and Conquer**

Your AV system isn't used for only one purpose, and your network should reflect that. Organize your Dante system into independent, non-interfering groups of devices called Dante Domains for a clear operational view of each space, across your network.

ALERTS AND AUDITS **What, how and who**

Dante Domain Manager delivers instant, rich information about all your Dante Domains with detailed alerts to help you fix problems fast. A complete Audit Log allow you to track all activities over any period of time to identify improper workflows, malfunctioning devices, and unwanted user actions quickly and definitively.

STATUS AT A GLANCE **What's Going On**

View the Dante Domain Manager Dashboard from any connected browser on your network or over a VPN connection. You get continuous, up to date information about all parts of your Dante system so you know immediately if anything goes wrong.

EXPANSION **Subnets and Long Distance**

Building out the AV coverage you need can be challenging. Dante Domain Manager lets you use Dante subnets on a routed network with no complicated setup and no change in performance. Support for GPS clock synchronization allows systems separated by long distances to share high quality audio and video.

USER AUTHENTICATION AND ROLES **Who's who**

When you work with volunteers and employees, accountability is key. Manage the use of Dante Controller with usernames and passwords that can be created locally or linked to your existing LDAP or Active Directory for easy setup. User Roles define what each person can do in each Dante Domain.

MULTI-VENDOR INTEROPERABILITY **Connect everybody**

Dante exists to facilitate multi-vendor AV systems, and Dante-enabled products from all vendors can seamlessly interoperate. Dante Domain Manager extends this further, allowing sync with house clocks and connection management with SMPTE 2110 devices.

DANTE DOMAIN MANAGER EDITIONS

Security and Control that grows with you.

Get started with a Dante Domain Manager edition that suits your needs exactly. Dante Nodes (devices) and Dante Domains can easily be added to any Edition, and key features are available to purchase as add-ons.

SILVER EDITION

- 2 DANTE DOMAINS
- 20 DANTE NODES

Dante Domain Manager Silver Edition brings cost effective protection against unwanted changes to your system and allows you to deploy Dante over routed networks. With support for 20 Dante Nodes and 2 Dante Domains, Dante Domain Manager Silver is an ideal solution for smaller installations in houses of worship, recording studios and broadcast facilities.

ADD-ONS let Dante Domain Manager Silver Edition grow to meet your needs.

- **ADD-ON** additional devices with Dante Node/Dante Domain packs (20/4, 50/10 and 100/20 available)
- **ADD-ON** SNMP integration with existing monitoring system
- **ADD-ON** High Availability redundancy for rapid recovery

GOLD EDITION

- 10 DANTE DOMAINS
- 100 DANTE NODES

Need more? Dante Domain Manager Gold Edition delivers the same protection and features as Dante Domain Manager Silver and adds LDAP/AD integration and advanced audit log filtering along with support for 100 Dante Nodes and 10 Dante Domains. Dante Domain Manager Gold is perfect for schools, small businesses, and larger houses of worship as part of a comprehensive AV management strategy.

ADD-ONS let Dante Domain Manager Gold Edition grow to meet your needs.

- **ADD-ON** additional devices with Dante Node/Dante Domain packs (20/4, 50/10 and 100/20 available)
- **ADD-ON** SNMP integration with existing monitoring system
- **ADD-ON** High Availability redundancy for rapid recovery

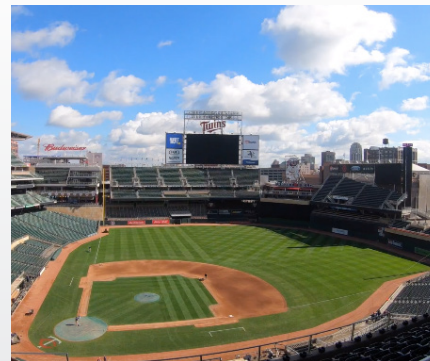

PLATINUM EDITION

Dante Domain Manager Platinum Edition is Dante management for the largest mission-critical systems found in universities, stadiums, public spaces, and corporate offices. Dante Domain Manager Platinum covers 250 Dante Nodes in up to 50 Dante Domains and delivers the same security and ease of use of the Silver and Gold editions with even more features, including SNMP support for rapid notification of issues and a High Availability mode that provides robust system redundancy in the event of failure.

The Dante Domain Manager Platinum Edition provides the complete feature set of Dante Domain Manager for ultimate peace of mind. Node + Domain packs allow you to expand your Dante system to over 1000 Dante nodes.

- **50 DANTE DOMAINS**
- **250 DANTE NODES**
- **COMPLETE DANTE DOMAIN MANAGER FEATURE SET**

+ **ADD-ON** additional devices with Dante Node/Dante Domain packs (20/4, 50/10 and 100/20 available)

ALL DANTE DOMAIN MANAGER EDITIONS FEATURE:

- User Authentication in Dante Controller
- Editable User Roles Permissions per Dante Domain
- Encrypted control traffic
- Automatic discovery of all Dante devices (Dante Nodes)
- Configuration of domains, including across subnets
- Real-time Dashboard and Alerts
- Detailed audit log
- Ability to share audio between Dante Domains
- Advanced external clock synchronization

DANTE DOMAIN MANAGER EDITIONS COMPARISON

EDITION FEATURES	SILVER	GOLD	PLATINUM
Base Number of Dante Domains	2	10	50
Base Number of Device Nodes	20	100	250
Enhanced event and alert filtering for detailed audits	—	✓	✓
LDAP and Active Directory integration for user authentication	—	✓	✓
ADD-ON: High Availability redundancy for rapid recovery	+	+	✓
ADD-ON: SNMP support for integration with existing alert monitoring system	+	+	✓
ADD-ON: Additional Dante nodes – up to 1,000 Dante devices	+	+	+
Perpetual License: Including one year of support and maintenance	USD \$995	USD \$3,995	USD \$9,995
Annual Subscription: With continuous support and maintenance:	USD \$398	USD \$1,598	USD \$3,998

- = not available
 + = available as add-on
 ✓ = included in base edition

All prices are for a perpetual license with one year of Support and Maintenance. Additional annual Support and Maintenance agreements sold separately.
